Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties (Update)

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

- CDFA and the U.S. Department of Agriculture (USDA) are scaling up their response to this incident, as more cases have been detected.
- CDFA confirmed that there are no commercial premises currently involved.
- CDFA confirmed that there is no public health risk due to this virus.
- Cal OES Southern Region along with Cal OES Logistics continue to assist CDFA in identifying a facility to expand operations in the immediate area of the CDFA district office in Ontario, San Bernardino County, as the current Incident Command Post (ICP) is too small for the current number of responders and supplies.

Activations

• San Bernardino Operational Area (OA) Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployment

- One (1) Cal OES Science and Technology Advisor deployed on 05/29/18 until 06/01/18 to the CDFA/USDA ICP as a Biosecurity Infectious Disease Subject Matter Expert with an operational period of 0700-1900 hours.
- One (1) Cal OES Southern Region Senior Emergency Services Coordinator (Sr. ESC) deployed to the CDFA/USDA ICP as an Agency Representative with an operational period of 0700-1900 hours.
- One (1) Cal OES Logistics Section Chief (Log Chief) deployed to the CDFA/USDA ICP with an operational period of 0700-1900 hours.

Logistics

Per the Cal OES Log Chief via the Cal OES Southern Region AREP on 05/30/18 at 0736 hours:

- The list of facilities from San Bernardino County Real Estate Services did not work out and will not be pursued.
- The Logistics Site Assessment Team (Cal OES/CDFA/USDA) will inspect a location in the Colton area on 05/30/18.
- An inquiry to locate available facilities in the area was sent to the California Department of General Services on 05/29/18.

WEATHER OF CONCERN

Weather of Concern

- A Red Flag Warning remains in effect for portions of southeastern California from late Wednesday morning through Thursday evening. A combination of strong winds, low relative humidity and warm temperatures can contribute to extreme fire behavior.
- Winds will likely increase in and near the desert Thursday with some gusts to 50 mph possible over the Antelope Valley, Banning Pass and the southern portion of the Owens Valley.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

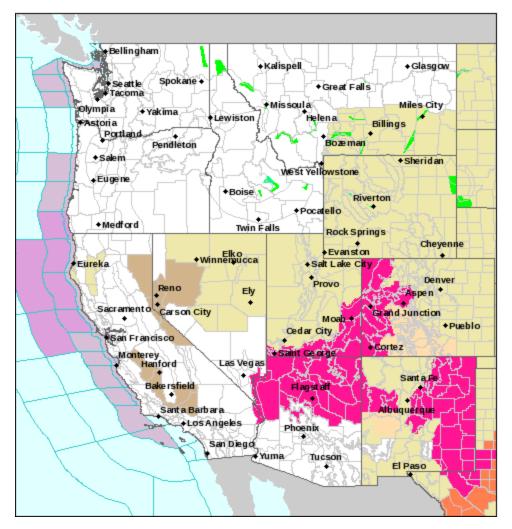

A weather system moving into the region today and Thursday will cool things down and bring in some higher relative humidity (RH). There will be some afternoon showers or mostly wet thunderstorms developing over our northern and eastern mountains today and Thursday. High pressure returns for the weekend with drier, hot conditions again into early next week. Another weak weather system will arrive about the middle of next week to cool things down somewhat. Afternoon high temperatures today will be near normal with the warmest areas mostly in the mid 80s, but Thursday they will be about 10 degrees below normal with the warmest inland areas mostly in the mid 70s. Highs over the weekend will return into the 90s. Many areas will have gusty afternoon S to W winds with peak gusts of 20-30 mph today with lighter winds over the next few days. Winds next week over the coastal counties, through The Delta and east of the Cascade/Sierra crest will settle into a typical summer diurnal pattern with gusty afternoon westerly winds.

SOUTHERN CALIFORNIA

The weak low which has been sitting off the coast the past few days will swing inland in phase with a trough over the Pacific Northwest. This will result in cooler, breezier weather over many areas today and Thursday. Onshore pressure gradients will increase which will generate west to southwest winds of 20-30 mph with higher gusts in and near the desert. Winds will likely increase in these same areas Thursday with some gusts to 50 mph possible over the Antelope Valley, Banning Pass and the southern portion of the Owens Valley. The marine layer will be deep the next two days, allowing low clouds and drizzle to penetrate the valleys and climb over 4,000 feet in the surrounding mountains. Temperatures will fall dramatically, especially over inland areas. By Thursday, highs will only be in the 60s along the coast to the lower 80s in the valleys. Isolated showers and one or two thunderstorms will be possible in the Sierra today, but no further convection is expected for the rest of the outlook period. This weekend, weak high pressure over the Southwest is expected to bring warmer weather back to the region. High temperatures will be back in the 90s in the valleys by Saturday and Sunday with far less marine layer coverage. Winds will be light after Friday. A slight cooling trend may occur early next week.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

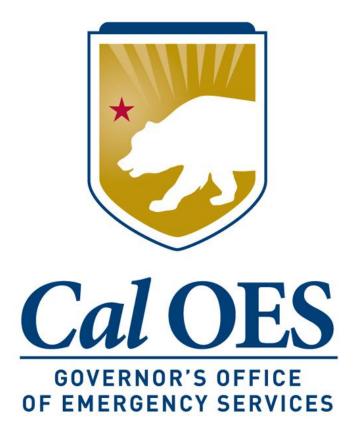

- 2018-LAW-46969, 05/29/18, 2329 hours: The Air Force Rescue Coordination Center (AFRCC) reported a Personal Locator Beacon (PLB) activation at 37 36.6 N, 122 01.0 W, which plotted to an area near Hayward, Alameda County. There was no listed registration information for the device. The beacon was detected only once, with no signal on a subsequent satellite pass. Alameda County Sheriff's Office (ACSO) was notified of the PLB activation and a Search & Rescue (SAR) mission was initiated. At 0150 hrs. AFRCC reported that the device was transmitting again, no change in location. ACSO was on scene and was unable to locate persons in distress or the device. Mission Closed.
- 2018-LAW-46959, 05/29/18, 1827 hours: The International Emergency Rescue Coordination Center (IERCC) reported an inReach device activation at 34 21' 40" N, 117 54' 9" W, which plotted to the Cooper Canyon Falls area of the Pacific Crest Trail in the Angeles National Forest, Los Angeles County. A single message from the device indicated the registered owner activated it on behalf of another person. The Los Angeles County Sheriff's Department (LASD) was notified and initiated a SAR mission, which was in the immediate vicinity of a mission they were already engaged in. At 1906 hrs. IERCC received a cancellation from the device, but no response to their inquiry messages. LASD was notified of the cancellation and incorporated it into their existing mission. Mission Closed.
- 2018-LAW-46949, 05/29/18, 1638 hours: AFRCC reported a 121.5 MhZ Emergency Locator Transmitter (ELT) activation being reported by multiple aircraft in northern California. A specific county of origin could not be identified. AFRCC initiated a Civil Air Patrol (CAP) mission request. At 1800 hrs. AFRCC reported that a CAP mission was initiated, Lt. Col. Mish was Incident Commander (I/C). At 2215 hrs. the I/C reported that the signal was no longer transmitting. Mission Closed.
- 2018-LAW-46933, 05/29/18, 0725 hours: AFRCC reported a Personal Locator Beacon (PLB) activation at 40 51.9 N, 123 57.8 W, which plotted to the Blue Lake area of Humboldt County. The registered owner did not answer his phone and the emergency contact was not immediately able to verify the registered owner's status. Humboldt County Sheriff's Office (HCSO) was notified and initiated a SAR mission. At 0813 hrs. the registered owner called from his home. He stated that the PLB device was stored in his pickup, and when he walked to the driveway to deactivate the device, he discovered that his pickup had been broken into. The PLB device was one of the items stolen. The SAR mission was closed and HCSO transitioned to a criminal investigation. Mission Closed.

Cal OES MISSION TASKING

Cal OES Missions

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
